

School **Scheduling** Support Services

We support schools to get the most out of their schedule to best utilize staff and maximize student learning.

Are you looking to make changes to your school schedule? While it is nearly impossible to get everything we want out of a school schedule, it is possible to do most things! Many schools are struggling to find common prep time for staff, or add in an intervention time, or make other changes. We are here to help. Whether you are looking to completely overhaul your school schedule, or make small adjustments, we specialize in supporting schools to get the most out of their time.

Built on Your Goals

The process begins with an initial meeting with the school or district team that is involved in the scheduling process. During that meeting, we will:

- Prioritize goals and determine the outcomes you hope to achieve from a revised school schedule
- Review current schedule
- Discuss possible options based on other schedules

Ongoing Support

Your success is our success! Our team will be available to your team throughout the entire process and beyond to ensure that your new schedule is implemented and leading to results.

Customized for Your School's Needs

Our team has years of experience building schedules for schools. We put that experience to work for you by examining your parameters and current structures, and making recommendations that will meet your needs.
